# DATA CONCIERGE SERVICES
# (COMMUNITECH)

Ample Insight helps augment start-ups' new and existing data and data labelling operations. We work with all data types, including, but not limited to: **photo, text, video, audio, and time-series data.** We provide **end-to-end data labelling solutions** including software tools, custom workflows, and data labelling specialists.

## WHAT MAKES US SPECIAL?

We work with a wide-range of start-ups from seed-stage to late-stage. Having scaled data science and AI operations at companies like Facebook and leading startups ourselves, we know and understand your pain points. We provide guidance on data strategy as part of our data labeling services for startups.

## WHAT SERVICES DO WE PROVIDE?

We provide tailored services in **data collection, classification, annotation, transcription, and transformation.**

More specifically, we provide services in object detection & tracking, image & text classification, named entity extraction, content moderation, document parsing, and much more.
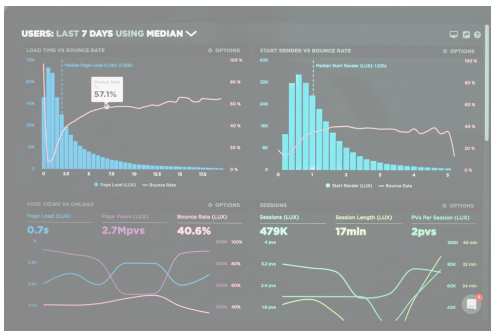

## CLIENT TESTIMONIALS

*Saranya Chandrasekar, People Data Lab Lead at **Unilever***

*"*They're very reliable and trustworthy. Our data science team applied the process that Ample created to other projects that we had as well. It was very innovative. They're very proactive and focused, exceeded our expectations, and the results were fantastic"

# ample insight

## Looking for additional data services?

### DATA ANALYTICS

For companies looking to **create actionable analytics for customers and/or internal consumption**. We help companies define and build the right analytics and visualizations for their business and product goals. Our services include helping businesses define and build:
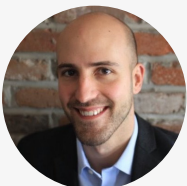

- Business and product analytics
- Customer insights and growth analytics (i.e. how to identify, track and convert high-value customers)
- Predictive analytics

### DATA ENGINEERING

For companies that **are tired of data delays, inaccuracies, and scalability issues**. We help companies fix, optimize, and scale their data and pipelines. We will also help organizations build a healthy and scalable data practice. Our services include:

- Data and ETL architecture
- Data acquisition strategies and integrations
- Data cleanup, aggregation, and consolidation

### CLIENT TESTIMONIALS

*John Paul Narowski, Co-founder & CTO at* **_ClickFlow_**.

"An absolute pleasure to work with Ample Insight. Their professionalism and skill not only contributed to the project's success but made the entire process enjoyable. We certainly will be working with them again."
